WHIPPING ONTO STEAM OCTOBER 30th!

LOS ANGELES, CA., October 12, 2015 – Get ready to experience the 80’s in 1080! We’re pleased to announce that *Hyperdimension Neptunia™ Re;Birth3: V Generation* will hit PCs on October 30th on the Steam platform. Previously released for the PlayStation®Vita handheld entertainment system, now you’ll get to experience the many shades of *Neptunia* with beautiful, high-resolution graphics! It will also be available for a 40% discount for the first week of launch!

Story

It’s time to Nep-Nep like it’s 1989. Neptune’s been sucked into an alternate dimension of Gamindustri! In order for her to escape from this late ‘80s world, Neptune will have to collect enough shares to open up the path to her own dimension. Sounds easy enough – except a nefarious alliance called the Seven Sages wants to rid Gamindustri of all CPUs, including Neptune!

Forging cross-dimensional friendships, will Neptune be able to defeat the Seven Sages, save this alternate dimension and get back to her own, or will she be stuck in the ‘80s forever?
